(54) SYSTEM CONTROLLER USING BRAIN WAVE

(57)Abstract:

PURPOSE: To control a specific equipment on the basis of correlation information on the waveform of brain waves.

CONSTITUTION: The brain waves of human bodies 1 and 2 detected by a contact type sensor S1 or noncontact type sensor S2 are discriminated by filters 4-7 into signals of respective frequency bands, which are processed by a signal processing and arithmetic circuit 15 as specified to judge the physiological states and mental states of the human bodies 1 and 2. The processing results of the signal processing and arithmetic circuit 15 are converted into signals for controlling equipments D1-Dn constituting a controlled system 30 by a transmission terminal circuit 16 and then the signals after the conversion are sent to a receiving terminal circuit 25 through a radio circuit 20 or wired circuit 23.

LEGAL STATUS

[Date of request for examination] 18.05.1994

[Date of sending the examiner's decision of rejection] 01.10.1996

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
